How to Get the Most Out of Studying
samford.edu/how-to-study/

"My experience in the Adrian College Psychology Department was absolutely incredible. The small class setting allowed me to make great connections with my professors, which opened opportunities for research and more personal recommendation letters when applying for scholarships and graduate school... They were truly open to my ideas and were happy to work with me in creating new projects and opportunities. The psychology faculty genuinely care about their students and are always willing to help with what you need to succeed. I felt exceptionally prepared for graduate school upon leaving the program. I could not have asked for anything more."

Megan DeBrabander
Class of 2019
