## **Interior Design**

This degree program is based on the guidelines of the Council for Interior Design Accreditation. It is structured to produce a highly qualified graduate with the professional ability to enter directly into the interior design profession. Students develop a strong liberal arts background with emphasis on the principles of design and the history of architecture and interiors, designed to enable them to express creative concepts and ideas. They develop technical drafting and rendering skills and a working knowledge of building construction, mechanical technology, and business practices. A portfolio is required, selected from design projects completed in school, to confirm proficiency and indicate the candidate's aptitude as a residential designer, commercial designer, kitchen and bath planner, space planner, showroom consultant, design specifier, display coordinator, designer and buyer, or interior illustrator. An internship experience with an interior design or architectural firm is required to provide exposure to the available resources and to enhance future employment opportunities. An active American Society of Interior Designers student chapter provides additional opportunities for professional activities. Interior design majors may complete the program on campus or elect to spend a semester at the American College in London, England.

Portfolio reviews are required at the end of the sophomore year and each semester of the junior and senior years. Seniors are required to participate in the NCIDQ student competition.

## **International Studies**

The international studies program was created in 1988 to address a growing need in our society. Because the world is increasingly a "global village," it becomes more important for each of us to develop an understanding of the other nations who share our planet and of our interdependence with them.

The international studies major, which leads to the Bachelor of Arts degree, provides an opportunity for students who wish to study a variety of societies, cultures and nations and the relationships among them. The diversity within the program makes it possible for students to develop a portion of their major in terms of their personal interests and goals.

All students in the program complete a core of courses that offers a broad overview of the world, along with an individually designed area of emphasis. Possible areas of emphasis include Asia, Comparative Twentieth-Century Studies, East-West Relations, Europe, International Thought and U.S.-Russian Relations.

Because of the interdisciplinary nature of the international studies major, faculty members represent many academic departments, including Art, Business Administration, Earth Science, Economics, English, Modern Languages and Cultures, History, Philosophy and Religion, Political Science, Sociology and Anthropology, and Teacher Education. In determining an area of emphasis, students work with the director of the international studies program.
