Adjunct Professor in Physics

The Department of Physics at Adrian College invites applications for an adjunct professor position for the Spring 2027 semester.

Summary

The successful applicant will teach one section of Physics 104 – Introductory Physics II Lab (Wednesdays, 4:00-6:50pm) and two sections of Physics 203 – Mechanics Laboratory (Thursdays, 9:00-11:50am & 1:00-3:50pm). All sections will be taught in-person at Adrian College.

Job Description

Duties include, but are not limited to:

- Leading scheduled lab sessions using the department's existing lab activities and manual, including a brief introduction to the physics and procedure at the start of each session
- Working directly with student groups during lab to guide data collection and analysis
- Grading lab reports and other lab work, returning feedback in a timely manner, and submitting final grades by college deadlines
- Setting up and troubleshooting equipment in coordination with department staff, and reporting damaged or missing equipment
- Maintaining a safe lab environment and enforcing lab safety procedures
- Responding promptly to student email and coordinating with the department on attendance and course policies

Qualifications

Minimum qualifications are an MS in physics or a related field plus teaching experience. A PhD in physics and experience teaching undergraduate physics are preferred.

Interested candidates should submit a CV and contact information for three references to Dr. Peter Cha at pcha@adrian.edu. Questions about the position should be directed to Dr. Cha.

Adrian College is an Equal Opportunity Employer.
